

1. EXECUTIVE SUMMARY

Our current ecommerce performance is facing significant challenges, with a substantial gap to our target goal of \$142. The data indicates that we are \$71 away from achieving this objective, which is a pressing concern that requires immediate attention. Furthermore, our probability of strategy success is currently at 0.0%, suggesting that our existing approach is not yielding the desired results. This stark reality necessitates a thorough reevaluation of our strategy to identify areas for improvement and implement corrective measures to get back on track.

The recent trend in Average Order Value is particularly alarming, as it has remained flat with no percentage change and low volatility. This lack of movement suggests that our efforts to increase customer spending have been ineffective, and we are not seeing the desired return on investment. To bridge the gap to our target goal, we must focus on revitalizing our strategy to drive growth in Average Order Value and ultimately boost our overall ecommerce performance. This will require a data-driven approach, leveraging insights to inform our decision-making and ensure that we are allocating resources effectively to maximize our return on investment and achieve our target goal of \$142.

4. CONVERSATIONAL DIALOGUE LOG (MODULE 6 Q&A)

Below is the transcript of analytical questions and corresponding AI synthesis answers processed during dataset exploration:

- Query 1: Analyze our Average Order Value trend and list key recommendations.**

AI Response: Your Average Order Value trend flat, with no percentage change and low volatility.
- Query 2: What is our cart abandonment rate and main drop-off point?**

AI Response: Cart abandonment is at 68.4%. The main drop-off point is the shipping cost calculation stage.
- Query 3: Analyze the repeat customer rate and contribution.**

AI Response: Repeat customers account for 28% of total traffic but contribute 48% of total revenue.
- Query 4: What is the Average Order Value?**

AI Response: The Average Order Value is approximately 109.48.
- Query 5: Show trend of Average Order Value**

AI Response: The Average Order Value has remained flat, with no percentage change over the period.
- Query 6: Compare performance of marketing channels.**

AI Response: Organic Search yields the highest conversion rate (3.2%), while Paid Social has the lowest CAC (\$18).
- Query 7: Identify top-performing product segments.**

AI Response: Home & Living segment grew 18% monthly, overtaking Fashion as the primary revenue driver.
- Query 8: How does mobile traffic compare to desktop traffic?**

AI Response: Mobile represents 72% of traffic but only 45% of orders due to higher checkout friction.
- Query 9: What is the seasonal peak for sales?**

AI Response: Sales peak during BFCM week in November, contributing 22% of annual ecommerce revenue.
- Query 10: Analyze the refund rate and common reasons.**

AI Response: Overall refund rate is 4.5%. Sizing mismatch in footwear accounts for 60% of all return requests.

5. PREDICTIVE TIME-SERIES FORECASTING (MODULE 8)

Predictive scenario projections derived from organic time-series baseline parameters.

Strategy Phase	Target Date	Baseline Value	Optimistic Strategy	Target Goal
History Start	Total	\$109	\$109	\$142
Current Baseline	Total	\$109	\$109	\$142
30-Day Project	2026-07-03	\$71	\$77	\$142
90-Day Project	2026-09-01	\$71	\$82	\$142
End Forecast	2026-11-29	\$71	\$82	\$142

7. STRATEGIC GOAL DECOMPOSITION (MODULE 7)

Decomposition Formula: average order value = Direct improvement

average order value (Increase unknown)

Drive direct improvement in average order value through focused operational effort.

Weight: 100%

8. STRATEGIC EXECUTION OPTIONS (MODULE 7)

Primary Execution Plan: Free Shipping Thresholds

Introduce free shipping thresholds, where customers receive free shipping on orders above a certain amount, encouraging them to add more items to their cart to qualify for free shipping, thereby increasing average order value. This can be promoted through targeted marketing campaigns and website banners.

Tier	Budget	Timeline	Expected Lift	Key Initiatives
Lean	< \$500	2-4 weeks	3–7%	Research best practices for "Free Shipping Thresholds" using free resources.; Implement manually using existing team bandwidth.; Track progress weekly with a simple spreadsheet or free analytics tool.
Balanced	\$500 – \$5k	1-2 months	8–15%	Subscribe to a dedicated SaaS tool that automates "Free Shipping Thresholds".; Assign one team member as the dedicated owner with a clear KPI target.; Set up automated weekly reporting via the tool's dashboard.
Premium	> \$5k	1-3 months	15–30%	Engage a specialist agency or consultant to execute "Free Shipping Thresholds" end-to-end.; Run a full campaign with dedicated budget allocation, A/B testing, and enterprise tooling.; Establish a weekly performance review cadence with the agency against defined OKRs.

9. LOCATION STRATEGY & TARGET SHARES (MODULE 7)

LOCATION STRATEGY ALLOCATION

Location	Performance Tier	Adjusted Target Share	Rationale
Mumbai	HIGH	unknown (+10% more aggressive)	Above-average historical performance — capitalize on momentum.
Delhi	MEDIUM	unknown (aligned with global target)	On-track with average performance — maintain current trajectory.
Bangalore	LOW	unknown (-5% more conservative)	Below-average performance — stabilize before aggressive growth.
