

STRATEGIC INTELLIGENCE REPORT

RETAIL

PROJECT METADATA

Archive: archive (1)
Project ID: batch-archive--1--896eba39
Domain: RETAIL
Generated: 3/5/2026, 10:28:37 pm
Summary: Comprehensive strategic intelligence report for archive (1). Analyzed 5 KPIs across 1 sources.

1. SELECTED KPIs & PERFORMANCE METRICS

2. AI INSIGHTS & SCHEMA ANALYSIS

Q1: Can the current schema structurally support a precise Total Sales aggregation?

A1: Yes, provided the "Amount" column is defined as DECIMAL or NUMERIC type.

Q2: To derive Gross Margin, does the existing table structure include Cost of Goods Sold?

A2: No, the 6-column schema lacks "Cost" fields; we must design an ETL join.

Q3: Is the dimensional granularity sufficient for "Sales per Store" KPIs?

A3: No, without a "Store ID" column, we cannot partition data at store level.

Q4: What structural dependencies exist for calculating Inventory Turnover?

A4: We require a separate Inventory fact table with "Stock Level" and "Date" columns.

Q5: For seasonal pattern analysis, is the "Date" column typed for time-series extraction?

A5: We must validate that "Date" is a TIMESTAMP type, not STRING.

3. KEY METRICS & FORECASTS

TARGET METRICS

Baseline: \$10,00,000
Target: \$12,50,000
Gap: \$2,50,000
Probability: 100%

FORECAST DATA

KPI: Total Sales
Trend: Bullish (25% Projected Growth)
Confidence: 40% Reliability

4. UPLOADED DATASETS
