

VistaraBI Strategic Intelligence Report

BUSINESS DOMAIN: RETAIL

EXECUTIVE SUMMARY

Comprehensive strategic intelligence report for archive (10). Analyzed 2 KPIs across 1 sources.

OPERATIONAL INTELLIGENCE DASHBOARD (MODULE 5)

STRATEGIC ROADMAP (MODULE 7)

- Omnichannel Expansion Starts**
Strategy Milestone for Day 5: Projected success uplift initiated.
- Omnichannel Expansion Ramp Complete**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Starts**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Ramp Complete**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Starts**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Ramp Complete**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Starts**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Ramp Complete**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Starts**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Ramp Complete**
Strategy Milestone for Day 50: Projected success uplift initiated.
- Targeted Social Ads Starts**
Strategy Milestone for Day 55: Projected success uplift initiated.
- Targeted Social Ads Ramp Complete**
Strategy Milestone for Day 65: Projected success uplift initiated.

- **Store Layout Update Starts**
Strategy Milestone for Day 65: Projected success uplift initiated.
- **Store Layout Update Ramp Complete**
Strategy Milestone for Day 75: Projected success uplift initiated.
- **Vendor Renegotiation Starts**
Strategy Milestone for Day 75: Projected success uplift initiated.
- **Cross-selling Promos Starts**
Strategy Milestone for Day 80: Projected success uplift initiated.
- **Vendor Renegotiation Ramp Complete**
Strategy Milestone for Day 85: Projected success uplift initiated.
- **Referral Program Starts**
Strategy Milestone for Day 85: Projected success uplift initiated.
- **Goal Target: 1250000**
Strategy Milestone for Day 90: Projected success uplift initiated.

ANALYTIC DIALOGUE (MODULE 6 Q&A)

Q1: Can the current schema structurally support a direct SUM aggregation on the 'Total' column? A1: Yes, but the N/A status suggests the ETL pipeline hasn't executed the aggregation or the column type is not numeric.

Q2: Is the table designed to allow Sales breakdowns by Branch and City dimensions? A2: Yes, 'Branch' and 'City' columns exist, enabling valid GROUP BY operations for geographical analysis.

Q3: What structural elements are missing to calculate the Profit KPI accurately? A3: The schema lacks 'Cost' or 'Margin' columns, requiring a join with an external Product Cost table.

Q4: Can we derive Sales Growth trends without an explicit Date column in the relevant list? A4: Only if the '+12 more' columns contain a timestamp; otherwise, time-series partitioning is structurally impossible.

Q5: Why is the Inventory Turnover KPI currently unsupported by this dataset? A5: There are no foreign keys linking to Inventory tables, preventing the ratio calculation between Sales and Stock.

Q6: What pipeline change is required to resolve the Stock Level KPI showing N/A? A6: Ingestion logic must be updated to pull stock data from the Warehouse Management System and join on Product ID.

Q7: How do we verify the schema supports Average Basket Size calculations? A7: We must confirm 'Invoice ID' cardinality and the presence of a 'Quantity' column to divide Total by transaction count.

Q8: Is the 'Customer type' column structurally optimal for segmentation filtering? A8: Yes, provided it has low cardinality, it is suitable for indexing to speed up customer segment queries.

Q9: What data type enforcement is critical for the 'Total' column during ingestion? A9: Enforce DECIMAL types instead of VARCHAR to prevent type casting errors during mathematical transformations.

Q10: How should the ETL architecture transform this flat structure for analytical efficiency? A10: Implement a Star Schema transformation, creating Fact_Sales and Dimension tables to optimize join performance.

PREDICTIVE FORECAST VISUALIZATION (MODULE 8)
