

VistaraBI Strategic Intelligence Report

BUSINESS DOMAIN: RETAIL

EXECUTIVE SUMMARY

Comprehensive strategic intelligence report for archive (11). Analyzed 1 KPIs across 1 sources.

OPERATIONAL INTELLIGENCE DASHBOARD (MODULE 5)

100.0%	\$2,50,000	\$12,50,000
Strategy Success Probability	Growth Gap to Target	Projected Goal Target

STRATEGIC ROADMAP (MODULE 7)

- Omnichannel Expansion Starts**
Strategy Milestone for Day 5: Projected success uplift initiated.
- Omnichannel Expansion Ramp Complete**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Starts**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Ramp Complete**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Starts**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Ramp Complete**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Starts**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Ramp Complete**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Starts**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Ramp Complete**
Strategy Milestone for Day 50: Projected success uplift initiated.
- Targeted Social Ads Starts**
Strategy Milestone for Day 55: Projected success uplift initiated.
- Targeted Social Ads Ramp Complete**
Strategy Milestone for Day 65: Projected success uplift initiated.

- **Store Layout Update Starts**
Strategy Milestone for Day 65: Projected success uplift initiated.
- **Store Layout Update Ramp Complete**
Strategy Milestone for Day 75: Projected success uplift initiated.
- **Vendor Renegotiation Starts**
Strategy Milestone for Day 75: Projected success uplift initiated.
- **Cross-selling Promos Starts**
Strategy Milestone for Day 80: Projected success uplift initiated.
- **Vendor Renegotiation Ramp Complete**
Strategy Milestone for Day 85: Projected success uplift initiated.
- **Referral Program Starts**
Strategy Milestone for Day 85: Projected success uplift initiated.
- **Goal Target: 1250000**
Strategy Milestone for Day 90: Projected success uplift initiated.

ANALYTIC DIALOGUE (MODULE 6 Q&A)

Q1: Can we structurally derive Total Sales from the available columns? A1: Yes, the schema provides `Global\_Sales` which acts as the aggregate, or you can ETL sum `NA\_Sales`, `EU\_Sales`, `JP\_Sales`, and `Other\_Sales`.

Q2: Are the sales columns defined with appropriate numeric data types for calculation? A2: Structural validation is required to ensure `NA\_Sales` through `Global\_Sales` are stored as FLOAT or DECIMAL, not VARCHAR, to prevent aggregation errors.

Q3: Does the schema support seasonal pattern analysis within a given year? A3: No, the `Year` column is granular only to the integer year level, lacking Month or Day columns required for intra-year seasonal transforms.

Q4: Can we join this data to a Store Dimension table to analyze sales per store? A4: No, there is no `Store\_ID` foreign key in the `vgsales` schema, preventing relational joins to any retail location dimension tables.

Q5: Is the schema structured to calculate Profit or Gross Margin KPIs? A5: No, there are no `Cost` or `Price` columns available, so Profit and Margin cannot be derived structurally without ingesting additional financial tables.

Q6: Does the data model include Inventory Turnover or Stock Level fields? A6: No, the schema is transactional sales data only; inventory tables would need to be ingested and linked via a `Product\_ID` which is currently absent.

Q7: Can we structurally support Footfall Conversion analysis with this dataset? A7: No, `Footfall` implies customer traffic data which is not represented in any column, making this KPI impossible to compute from this structure.

Q8: How should we handle potential discrepancies between `Global\_Sales` and the sum of regional columns during ETL? A8: The pipeline should include a validation step to check if `Global\_Sales` equals the sum of regions, flagging structural inconsistencies for engineering review.

Q9: Are `Platform` and `Genre` suitable for categorical grouping in a data warehouse dimension table? A9: Yes, these columns contain discrete string values suitable for normalization into Dimension Tables for slicing and dicing in the BI layer.

Q10: What ETL logic is required to materialize the Total Sales KPI given the current N/A status? A10: The pipeline must explicitly select `Global\_Sales` or compute the regional sum, cast to numeric, handle NULLs as zero, and aggregate to update the KPI summary table.

PREDICTIVE FORECAST VISUALIZATION (MODULE 8)

90-Day Predictive Strategy Horizon (Prophet + Monte Carlo)
