

VistaraBI Strategic Intelligence Report

BUSINESS DOMAIN: RETAIL

EXECUTIVE SUMMARY

Comprehensive strategic intelligence report for archive (4). Analyzed 0 KPIs across 2 sources.

OPERATIONAL INTELLIGENCE DASHBOARD (MODULE 5)

100.0%

Strategy Success Probability

\$2,50,000

Growth Gap to Target

\$12,50,000

Projected Goal Target

STRATEGIC ROADMAP (MODULE 7)

- **Omnichannel Expansion Starts**
Strategy Milestone for Day 5: Projected success uplift initiated.
- **Omnichannel Expansion Ramp Complete**
Strategy Milestone for Day 15: Projected success uplift initiated.
- **Dynamic Pricing Starts**
Strategy Milestone for Day 15: Projected success uplift initiated.
- **Dynamic Pricing Ramp Complete**
Strategy Milestone for Day 25: Projected success uplift initiated.
- **Loyalty Program Launch Starts**
Strategy Milestone for Day 25: Projected success uplift initiated.
- **Loyalty Program Launch Ramp Complete**
Strategy Milestone for Day 35: Projected success uplift initiated.
- **Inventory Optimization Starts**
Strategy Milestone for Day 35: Projected success uplift initiated.
- **Inventory Optimization Ramp Complete**
Strategy Milestone for Day 45: Projected success uplift initiated.
- **Flash Sales Event Starts**
Strategy Milestone for Day 45: Projected success uplift initiated.
- **Flash Sales Event Ramp Complete**
Strategy Milestone for Day 50: Projected success uplift initiated.
- **Targeted Social Ads Starts**
Strategy Milestone for Day 55: Projected success uplift initiated.
- **Targeted Social Ads Ramp Complete**
Strategy Milestone for Day 65: Projected success uplift initiated.
- **Store Layout Update Starts**
Strategy Milestone for Day 65: Projected success uplift initiated.
- **Store Layout Update Ramp Complete**
Strategy Milestone for Day 75: Projected success uplift initiated.
- **Vendor Renegotiation Starts**
Strategy Milestone for Day 75: Projected success uplift initiated.

- **Cross-selling Promos Starts**
Strategy Milestone for Day 80: Projected success uplift initiated.
 - **Vendor Renegotiation Ramp Complete**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Referral Program Starts**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Goal Target: 1250000**
Strategy Milestone for Day 90: Projected success uplift initiated.
-

ANALYTIC DIALOGUE (MODULE 6 Q&A)

Q1: Can we query Total Sales by region for the last quarter?

A1: Structurally, the `Wireless Service Corp Business Performance` table currently defines 0 columns, so no `Sales\_Amount` or `Region\_ID` fields exist to support this aggregation.

Q2: Is the schema ready to calculate Gross Margin per product category?

A2: No, the current DDL lacks `Cost\_Price` and `Retail\_Price` columns with numeric types required to derive the margin formula structurally.

Q3: How do we join store metadata with transaction logs for Sales per Store KPIs?

A3: There is no defined foreign key relationship or `Store\_ID` column in the available tables to establish a valid join condition.

Q4: Can we track Inventory Turnover ratios over time?

A4: The pipeline cannot compute this yet; the schema is missing `Stock\_Level` and `COGS` fields necessary for the turnover calculation logic.

Q5: Are date types configured to support seasonal pattern analysis?

A5: Without a defined `Transaction\_Date` column with a `TIMESTAMP` data type, temporal grouping for seasonality is not structurally possible.

Q6: Can we integrate the Competitor Price Analysis data for price elasticity modeling?

A6: The `Competitor Price Analysis` table shows 0 columns in the catalog, indicating the ingestion pipeline has not yet mapped any source fields.

Q7: Is the data type for Average Basket Size set to handle decimal precision?

A7: We cannot validate precision yet because the underlying `Transaction\_Value` and `Item\_Count` columns are not defined in the current schema.

Q8: Do we have the structural capacity to measure Footfall Conversion rates?

A8: This requires a union or join between footfall sensor data and sales transactions, but no common key or table structure exists currently.

Q9: Has the ETL pipeline transformed raw logs into the required Revenue format?

A9: The transformation logic cannot be verified as successful because the target table schema accepts 0 columns, implying a load failure or misconfiguration.

Q10: What is the blocking issue for generating the Profit and Sales Growth report?

A10: The primary blocker is structural; both source tables lack column definitions, preventing any SQL compilation or metric derivation.

PREDICTIVE FORECAST VISUALIZATION (MODULE 8)

KPI: General Retail Performance | Trend: Bullish (25% Projected Growth)
Confidence Score: 40% Reliability
