

VistaraBI Strategic Intelligence Report

BUSINESS DOMAIN: RETAIL

EXECUTIVE SUMMARY

Comprehensive strategic intelligence report for archive (5). Analyzed 2 KPIs across 1 sources.

OPERATIONAL INTELLIGENCE DASHBOARD (MODULE 5)

Top Categories by Revenue

76.2%

+8.4% vs prev

Total Sales

38.6M

+1.3% vs prev

100.0%

Strategy Success Probability

\$2,50,000

Growth Gap to Target

\$12,50,000

Projected Goal Target

STRATEGIC ROADMAP (MODULE 7)

- **Omnichannel Expansion Starts**
Strategy Milestone for Day 5: Projected success uplift initiated.
- **Omnichannel Expansion Ramp Complete**
Strategy Milestone for Day 15: Projected success uplift initiated.
- **Dynamic Pricing Starts**
Strategy Milestone for Day 15: Projected success uplift initiated.
- **Dynamic Pricing Ramp Complete**
Strategy Milestone for Day 25: Projected success uplift initiated.
- **Loyalty Program Launch Starts**
Strategy Milestone for Day 25: Projected success uplift initiated.
- **Loyalty Program Launch Ramp Complete**
Strategy Milestone for Day 35: Projected success uplift initiated.
- **Inventory Optimization Starts**
Strategy Milestone for Day 35: Projected success uplift initiated.
- **Inventory Optimization Ramp Complete**
Strategy Milestone for Day 45: Projected success uplift initiated.
- **Flash Sales Event Starts**
Strategy Milestone for Day 45: Projected success uplift initiated.
- **Flash Sales Event Ramp Complete**
Strategy Milestone for Day 50: Projected success uplift initiated.
- **Targeted Social Ads Starts**
Strategy Milestone for Day 55: Projected success uplift initiated.
- **Targeted Social Ads Ramp Complete**
Strategy Milestone for Day 65: Projected success uplift initiated.

- **Store Layout Update Starts**
Strategy Milestone for Day 65: Projected success uplift initiated.
 - **Store Layout Update Ramp Complete**
Strategy Milestone for Day 75: Projected success uplift initiated.
 - **Vendor Renegotiation Starts**
Strategy Milestone for Day 75: Projected success uplift initiated.
 - **Cross-selling Promos Starts**
Strategy Milestone for Day 80: Projected success uplift initiated.
 - **Vendor Renegotiation Ramp Complete**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Referral Program Starts**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Goal Target: 1250000**
Strategy Milestone for Day 90: Projected success uplift initiated.
-

ANALYTIC DIALOGUE (MODULE 6 Q&A)

Q1: Can we currently segment sales by Product Category to identify top performers?

A1: No, the schema lacks a CATEGORY column; ITEM DESCRIPTION is unstructured text, requiring a dimension table mapping ITEM CODE to Category IDs.

Q2: Is the Revenue KPI calculable with the existing 9 columns?

A2: No, Revenue requires UNIT_PRICE and QUANTITY columns, which are not listed in the current 'Retail and warehouse Sale' schema.

Q3: How do we structurally support Profitability analysis given the current fields?

A3: We need to ingest a COST column from the ERP system; currently, only SUPPLIER and ITEM details exist, preventing margin calculations.

Q4: Can we analyze Sales per Store to evaluate location impact?

A4: No, there is no STORE_ID or LOCATION column; the schema needs normalization to include a Store Dimension table linked via foreign key.

Q5: Are the YEAR and MONTH columns suitable for time-series seasonal pattern analysis?

A5: Only if typed as integers; if stored as strings, ETL must cast them to DATE or INT types to enable proper sorting and window functions.

Q6: What structural changes are needed to compute Inventory Turnover?

A6: A separate INVENTORY_FACT table is required to join against Sales data, as stock levels are not present in the transactional sale schema.

Q7: Is ITEM DESCRIPTION reliable for grouping items in an ETL pipeline?

A7: No, high-cardinality strings cause performance issues; we should transform this into a low-cardinality ITEM_CATEGORY_ID during ingestion.

Q8: How do we ensure SUPPLIER data integrity for join operations?

A8: The SUPPLIER column must be enforced as a Foreign Key referencing a validated SUPPLIER_DIM table to prevent orphaned records during joins.

Q9: What ETL transformation logic is needed to aggregate Total Sales?

*A9: An aggregation layer must sum QUANTITY * PRICE grouped by time periods, but this fails currently due to missing numeric price/qty fields.*

Q10: What is the recommended target schema architecture to support all requested KPIs?
A10: Implement a Star Schema with a Fact_Sales table containing measurable metrics and Dimension tables for Product, Store, Time, and Supplier.

PREDICTIVE FORECAST VISUALIZATION (MODULE 8)

KPI: Total Sales | Trend: Bullish (25% Projected Growth)
Confidence Score: 40% Reliability
