

VistaraBI Strategic Intelligence Report

BUSINESS DOMAIN: RETAIL

EXECUTIVE SUMMARY

Comprehensive strategic intelligence report for archive (8). Analyzed 1 KPIs across 1 sources.

OPERATIONAL INTELLIGENCE DASHBOARD (MODULE 5)

100.0%

Strategy Success Probability

\$2,50,000

Growth Gap to Target

\$12,50,000

Projected Goal Target

STRATEGIC ROADMAP (MODULE 7)

- Omnichannel Expansion Starts**
Strategy Milestone for Day 5: Projected success uplift initiated.
- Omnichannel Expansion Ramp Complete**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Starts**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Ramp Complete**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Starts**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Ramp Complete**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Starts**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Ramp Complete**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Starts**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Ramp Complete**
Strategy Milestone for Day 50: Projected success uplift initiated.
- Targeted Social Ads Starts**
Strategy Milestone for Day 55: Projected success uplift initiated.
- Targeted Social Ads Ramp Complete**
Strategy Milestone for Day 65: Projected success uplift initiated.

- **Store Layout Update Starts**
Strategy Milestone for Day 65: Projected success uplift initiated.
 - **Store Layout Update Ramp Complete**
Strategy Milestone for Day 75: Projected success uplift initiated.
 - **Vendor Renegotiation Starts**
Strategy Milestone for Day 75: Projected success uplift initiated.
 - **Cross-selling Promos Starts**
Strategy Milestone for Day 80: Projected success uplift initiated.
 - **Vendor Renegotiation Ramp Complete**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Referral Program Starts**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Goal Target: 1250000**
Strategy Milestone for Day 90: Projected success uplift initiated.
-

ANALYTIC DIALOGUE (MODULE 6 Q&A)

Q1: Can we directly query the Active SKU Count from the current superstore_data table to identify anomalies?

A1: No, the current schema lacks a Product dimension table; there is no column defined to store SKU identifiers or inventory status required for this metric.

Q2: Is it possible to derive SKU activity using the NumStorePurchases column instead?

A2: Structurally no, because NumStorePurchases is aggregated at the Customer ID level, not granular enough for SKU-level transformation.

Q3: How would we model seasonal patterns if we lack transaction dates?

A3: We need to ingest a Transaction Fact table with a DATE type column to enable time-series partitioning and analysis.

Q4: Can we join this customer data with store performance metrics currently?

A4: Not without a schema update; there is no Store_ID foreign key to establish a valid join relationship between tables.

Q5: What columns are required to calculate Gross Margin at the SKU level for profitability?

A5: You need explicit Cost and Price columns in the Product table; neither exists in the current 22-column schema.

Q6: Is the current data type for Id suitable for joining with transaction records?

A6: Yes, the Id column is likely an INT, but ensure the transaction table uses matching types to prevent join failures.

Q7: If we migrate to a star schema, how does the ETL pipeline change?

A7: The pipeline must transform flat files into normalized dimensions (DimProduct, DimStore) and a FactSales table before loading.

Q8: What format should the new SKU column use to ensure compatibility?

A8: Use VARCHAR to preserve leading zeros and alphanumeric characters, avoiding INT types that might truncate format.

Q9: Can we calculate Inventory Turnover with the existing structural design?

A9: No, that KPI requires a separate Inventory Snapshot table within the schema to track stock levels, which is not present.

Q10: What is the final structural verdict on delivering this Active SKU Count KPI?

A10: The KPI is blocked; you must expand the schema and update the ETL ingest logic to include product-level granularity.

PREDICTIVE FORECAST VISUALIZATION (MODULE 8)

KPI: Active SKU Count | Trend: Bullish (25% Projected Growth)

Confidence Score: 40% Reliability
