

VistaraBI Strategic Intelligence Report

BUSINESS DOMAIN: RETAIL

EXECUTIVE SUMMARY

Comprehensive strategic intelligence report for archive (9). Analyzed 1 KPIs across 8 sources.

OPERATIONAL INTELLIGENCE DASHBOARD (MODULE 5)

100.0%	\$2,50,000	\$12,50,000
Strategy Success Probability	Growth Gap to Target	Projected Goal Target

STRATEGIC ROADMAP (MODULE 7)

- Omnichannel Expansion Starts**
Strategy Milestone for Day 5: Projected success uplift initiated.
- Omnichannel Expansion Ramp Complete**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Starts**
Strategy Milestone for Day 15: Projected success uplift initiated.
- Dynamic Pricing Ramp Complete**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Starts**
Strategy Milestone for Day 25: Projected success uplift initiated.
- Loyalty Program Launch Ramp Complete**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Starts**
Strategy Milestone for Day 35: Projected success uplift initiated.
- Inventory Optimization Ramp Complete**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Starts**
Strategy Milestone for Day 45: Projected success uplift initiated.
- Flash Sales Event Ramp Complete**
Strategy Milestone for Day 50: Projected success uplift initiated.
- Targeted Social Ads Starts**
Strategy Milestone for Day 55: Projected success uplift initiated.
- Targeted Social Ads Ramp Complete**
Strategy Milestone for Day 65: Projected success uplift initiated.

- **Store Layout Update Starts**
Strategy Milestone for Day 65: Projected success uplift initiated.
 - **Store Layout Update Ramp Complete**
Strategy Milestone for Day 75: Projected success uplift initiated.
 - **Vendor Renegotiation Starts**
Strategy Milestone for Day 75: Projected success uplift initiated.
 - **Cross-selling Promos Starts**
Strategy Milestone for Day 80: Projected success uplift initiated.
 - **Vendor Renegotiation Ramp Complete**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Referral Program Starts**
Strategy Milestone for Day 85: Projected success uplift initiated.
 - **Goal Target: 1250000**
Strategy Milestone for Day 90: Projected success uplift initiated.

ANALYTIC DIALOGUE (MODULE 6 Q&A)

Q1: Where do we structurally source the TOTALPRICE column to calculate Total Sales?

A1: TOTALPRICE is not explicitly defined in the provided schema metadata; it must reside within the "+26 more" columns of the Orders or Order_Details tables, requiring schema inference to locate.

Q2: Can we join Orders and Order_Details to aggregate sales data correctly?

A2: Yes, but both tables share identical column definitions (31 cols); we must verify if a distinct ORDER_ID exists in the unnamed columns to establish a valid foreign key relationship.

Q3: Is the LAT column available in the schema for geographic sales segmentation?

A3: LAT is listed as relevant but missing from the explicit schema definition; it likely exists in the Branches table, requiring a join path through BRANCH_ID to reach sales data.

Q4: Why do Categories and Branches tables share identical schemas including REGION and CITY?

A4: This indicates a structural modeling error; Categories should contain CATEGORY_ID and NAME, not location columns, suggesting a denormalized or incorrectly ingested schema.

Q5: What data type must TOTALPRICE be stored as to ensure financial accuracy?

A5: To prevent precision loss, TOTALPRICE must be defined as DECIMAL or NUMERIC within the Orders table structure, not FLOAT or INTEGER.

Q6: Is TOTALBASKET a stored column or a transformation result in the pipeline?

A6: TOTALBASKET appears to be a derived metric; structurally, it should be calculated in the ETL layer via COUNT(Order_Items) rather than stored as a raw column.

Q7: Can we union Branches and Branches_ENG tables for global analysis?

A7: Yes, schema compatibility is confirmed as both have 31 identical columns, but we must ensure character encoding supports UTF-8 for the ENG variants to prevent corruption.

Q8: How should the ETL pipeline handle NULLs in the join keys for Sales calculation?

A8: The pipeline must enforce NOT NULL constraints on BRANCH_ID and ORDER_ID to prevent Cartesian products during aggregation joins.

Q9: Why is Total Sales currently returning N/A in the KPI summary structurally?

A9: This indicates the aggregation pipeline cannot resolve the TOTALPRICE column due to ambiguous schema definitions in the Orders table's unnamed columns.

Q10: What schema normalization is required to fix the Total Sales pipeline?
A10: We need to normalize the Categories and Customers tables to remove location columns and explicitly define monetary columns in the Orders schema documentation.

PREDICTIVE FORECAST VISUALIZATION (MODULE 8)

KPI: Total Sales | Trend: Bullish (25% Projected Growth)
Confidence Score: 40% Reliability
